- *Fourth quarter non-GAAP operating margin was a record 31% leading to \$0.13 EPS*

BRIDGEWATER, N.J. — February 6, 2007 — Synchronoss Technologies, Inc. (Nasdaq: SNCR), the premier provider of on-demand transaction management software to Tier One communications service providers, today announced its operating results for the fourth quarter ended December 31, 2006.

Stephen G. Waldis, President and Chief Executive Officer of Synchronoss, stated, “Our fourth quarter results were in-line or better-than the updated guidance provided on January 9, 2007. The company generated strong top line growth of 36% in the fourth quarter, which was slightly ahead of our full year growth. In addition, the company’s gross and operating margins were at record levels in the fourth quarter.” Waldis added, “As we look to 2007, we believe that Synchronoss is positioned very well to benefit from the growing trend towards converged services, based on the strength of our technology, network integration skills and blue chip customer base across each key sector in the communication service provider market place. As a result of strong industry fundamentals and recent customer developments, we are increasingly excited about the business opportunities for Synchronoss in 2007 and beyond.”

For the fourth quarter of 2006, Synchronoss reported net revenue of \$20.3 million, representing an increase of 36% on a year-over-year basis and 8% on a sequential basis. Gross profit for the fourth quarter of 2006 was \$11.8 million, including the impact of fair value stock compensation expense, representing a related gross margin of 58%. Synchronoss reported income from operations, in accordance with generally accepted accounting principles (“GAAP”), of \$6.1 million. This included \$302,000 of non-cash, fair value stock-based compensation expense. GAAP net income was \$4.0 million for the fourth quarter of 2006, leading to GAAP diluted earnings per share of \$0.12.

Lawrence Irving, Chief Financial Officer and Treasurer, stated, “During the fourth quarter, the company’s gross margins were better-than-expected and at a record level due to several factors, including automation rates that were materially better than expected and new transaction types that did not occur as early as originally anticipated. New transactions typically require up front investments and therefore carry lower initial gross margins, and the company is currently making those investments in the current first quarter as these new transactions move toward production. We believe these investments are critical to our long-term success, and we believe they will be increasingly leveraged as 2007 proceeds.”

Non-GAAP gross profit for the fourth quarter of 2006 was \$11.9 million, an increase of 70% on a year-over-year basis. The related gross margin for the fourth quarter of 2006 was 58%, an increase from 55% in the prior quarter and 47% in the fourth quarter of 2005. Non-GAAP income from operations, which excludes fair value stock-based compensation expense, was \$6.4 million in the fourth quarter of 2006, representing growth of 154% on a year-over-year basis and a non-GAAP operating margin of 31%. Based on a 41.9% effective tax rate, non-GAAP net income was \$4.2 million, leading to non-GAAP diluted earnings per share of \$0.13.

A reconciliation of GAAP to non-GAAP results has been provided in the financial statement tables included in this press release. An explanation of these measures is also included below under the heading “Non-GAAP Financial Measures.”

Synchronoss had cash, cash equivalents, and marketable securities of \$79.0 million at December 31, 2006, an increase of \$6.0 million compared to the end of the prior quarter. The increase in cash was a result of strong cash generation in the quarter.

Non-GAAP Financial Measures

Synchronoss has provided in this release selected financial information that has not been prepared in accordance with GAAP. This information includes historical non-GAAP operating income, net income, effective tax rate, and earnings per share. Synchronoss uses these non-GAAP financial measures internally in analyzing its financial results and believes they are useful to investors, as a supplement to GAAP measures, in evaluating Synchronoss's ongoing operational performance. Synchronoss believes that the use of these non-GAAP financial measures provides an additional tool for investors to use in evaluating ongoing operating results and trends, and in comparing its financial results with other companies in Synchronoss's industry, many of which present similar non-GAAP financial

measures to investors. As noted, the non-GAAP financial results discussed above exclude fair value stock-based compensation expense for the three and twelve months ended December 31, 2006.

Non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. Investors are encouraged to review the reconciliation of these non-GAAP measures to their most directly comparable GAAP financial measure as detailed above. As previously mentioned, a reconciliation of GAAP to non-GAAP results has been provided in the financial statement tables included in this press release.
