

Synchronoss Unveils Rebranded NetworkX Product Portfolio at ChannelVision Expo 2022

November 2, 2022

Company Aligns Components of its Digital Products and Platforms to Enable Telecom Service Providers to Optimize the Utilization of their Network Assets and Services While Reducing Costs

BRIDGEWATER, N.J., Nov. 02, 2022 (GLOBE NEWSWIRE) -- Synchronoss Technologies, Inc. ("Synchronoss" or the "Company") (NASDAQ: SNCR), a global leader and innovator in cloud, messaging and digital products and platforms, today announced the launch of [NetworkX](#) at [ChannelVision Expo 2022](#). NetworkX reflects the company's focused value proposition for its digital products portfolio, enabling telecom service providers to significantly increase the utilization of network infrastructure, assets, services, and reduce costs.

NetworkX represents the next evolution of the company's products, formerly known as spatialSUITE, iNOW and Financial Analytics. The rebranded NetworkX is comprised of SpatialNX, ConnectNX, and ExpenseNX – an integrated suite of tools to enable telecom service providers to automate and manage numerous aspects of network operations, including expanding physical network footprint, exchanging and fulfilling third-party capacity orders, and validating and managing associated network expenses.

To keep pace with continuously changing market dynamics, telecom service providers are constantly expanding their networks, adding new services, and coordinating connectivity from many different partners. NetworkX provides the capability to optimize network operations and achieve significant cost reductions. Key capabilities and functions of NetworkX include:

- **Expand Networks** – central repository for end-to-end network inventory, reducing costs and accelerating deployment time.
- **Exchange Network Orders** – automates processes across suppliers to streamline the service order lifecycle, reducing order errors and improving readiness.
- **Expense Management** – intelligent system that enforces financial compliance and control, mitigating risk, and increasing operating efficiencies.

"We rebranded NetworkX within our digital products portfolio to help today's telecom service providers maximize their network infrastructure, utilize assets, and tightly control costs," said Jeff Gill, SVP & General Manager Synchronoss's NetworkX Business Unit. "From network expansions and buildouts to orchestrating orders and managing telecom expenses, NetworkX provides a comprehensive toolset and analytics to automate operations and mitigate overspending. As a result, telecom service providers can speed time to revenue and improve margins."

See us at ChannelVision Expo 2022
